AIR FORCE ADMITS UFOS REAL

For years the United States Air Force has denied that UFOs exist. Now, in an amazing turnaround, they say:

"UFOs are material objects which are either 'manned' or remote-controlled by beings who are alien to this planet."

This astonishing revelation appeared in an official Air Force textbook, "Space Science, volume II," which was written by Air Force instructors and is used to teach cadets at the Air Force Academy in

ALFRED PIROZZOLI
UFO researcher

Colorado.

Its thoroughly researched findings reveal that:

- UFOs come from other planets.
- They are egg-shaped vehicles.
- Their crews include three-and-a-half-foot-high creatures with wrap-around eyes.

• UFOs have been buzzing Earth for the past 50,000 years.

• Air Force fighters have chased and fired upon UFOs.

During the 1950s, says the text, "a radar site near a fighter base picked up a UFO doing 700 mph.

"The UFO then slowed to 100 mph, and two F-86s were scrambled to intercept. When the range reached 1,000 yards, one pilot aimed his guns and fired in an attempt to down the saucer.

"He failed and the UFO pulled away rapidly, vanishing in the distance."

The most commonly described alien, say the scientists who wrote the book, "is about 3 1/2 feet tall, has a round head, and arms reaching down to his knees."

There is, says the Air Force text, "the unpleasant possibility of alien visitors to our planet."

The textbook was published in 1966, but UFO researcher Alfred S. Pirozzoli says it was kept from the public until he uncovered it.

"I've been looking for this book the last 10 years," Pirozzoli said in Naugatuck, CT.

"But the Air Force always denied there was an academic textbook dealing with UFOs."

Midnight Globe 3 April, 1979

The book has been available for years. Most UFO groups do have copies, but it proves nothing.

Spot UFOs near L. Michigan

Witnesses reported seeing as many as 20 brightly lighted, unidentified objects Monday in southwestern Michigan and northern Indiana, it was reported today.

The lighted objects, described by one witness as "like putting diamonds and rubies up to a very bright light," were observed near Lake Michigan.

Benton Harbor, Mich., police said they have received several other reports of the strange lighted objects in recent weeks.

J. Allen Hynek, director of the Center for UFO Studies, is investigating the sightings.

What UFOs?

Northwestern University astronomer Dr. J. Allen Hynek says he can't understand why scientists and the government are so apathetic about solving the UFO mystery. "UFOs exist and persist," he says. "You would think the scientific community would be agog and just dying to learn more. You would think the Defense Department would want to know what many of its pilots and radar operators have seen. What has happened to human curiosity?"

Rickenbacker Thinks Flying Saucers Real

PAPER UNKNOWN
INDIANAPOLIS, Ind.
June 12 ~~1970~~ Capt. Eddie Rickenbacker, World War I air ace and formerly of Columbus, O., says he thinks flying saucers are real.

Rickenbacker, president of Eastern Air Lines, flew in yesterday and told a reporter: "Too many good men have seen them. And if they exist, you can bet they belong to the United States Air Force." Air officials have insisted they have no such equipment.
